cm

clash management suite

The cms Clash Management Suite addresses the **Design**, **Data**, and **Cost** of the Clash Management Process.

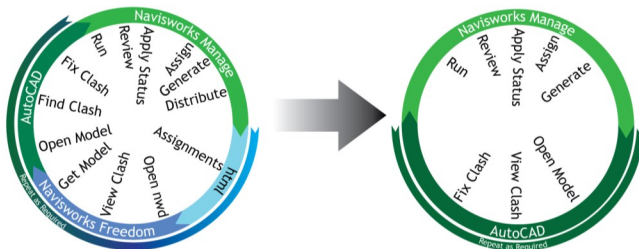

Design

♦ Streamline Design Process

♦ Improve Accuracy

Data

♦ One source for Clash data
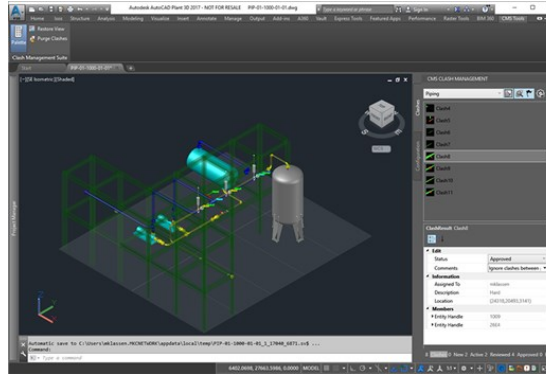

♦ Accurate Tracking

Cost

♦ Reduce Design Time
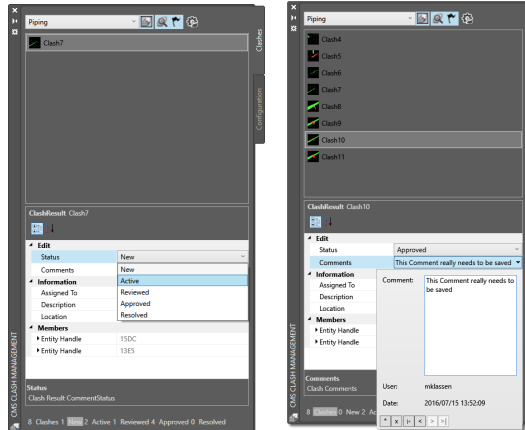

♦ Reduce Licensing Requirements

Seamless AutoCAD Integration

All Clashes in the model are available at a glance, and are color coded to match Navisworks Manage status colors. The ribbon and palette are designed to become a part of the designer's workflow.

Comments and Statuses can be edited in AutoCAD and loaded back into Navisworks.

for more information.

Review/Update changes in Navisworks

With the Navisworks Add-in, changes can be reviewed, and edited prior to updating the clashes.

Once the changes are approved, they are applied to the model, and become a permanent part of the Clash History for the model.
