Clash Management Suite

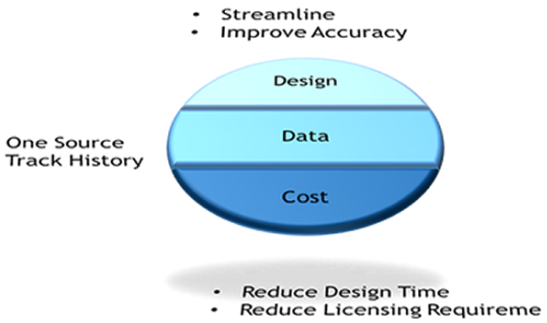
Streamline

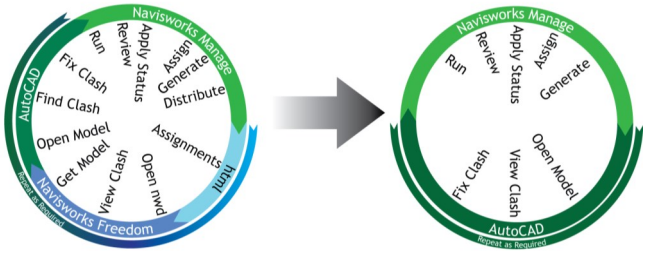
Integrate

Manage Navisworks® Clashes in AutoCAD®

CaManSys Clash Management Suite is a set of add-ins for AutoCAD and Navisworks Manage that provide tools for viewing and resolving Clashes generated by Navisworks Manage. Using the add-in in AutoCAD, clash status and comments can be modified and the changes imported back into Navisworks to record all clash modifications.

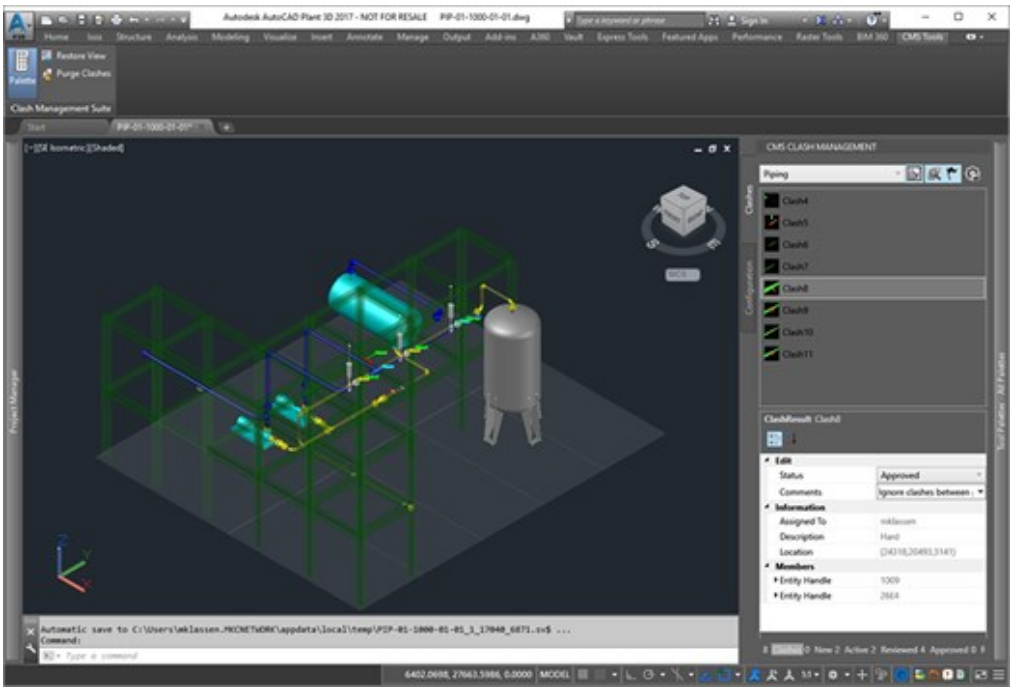
The Clash Management Suite addresses the **Design**, **Data**, and **Cost** of the Clash Management Process.





The Clash Management Process is reduced from 13 steps per clash to seven, improving accuracy and reducing the amount of time and effort to resolve each clash.

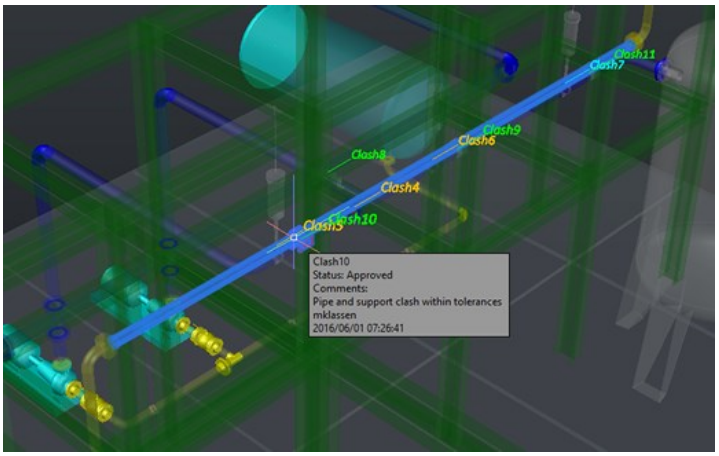
All Clashes in the model are available at a glance, and are color coded to match Navisworks Manage status colors. The ribbon and palette are designed to be a part of the designer's workflow.

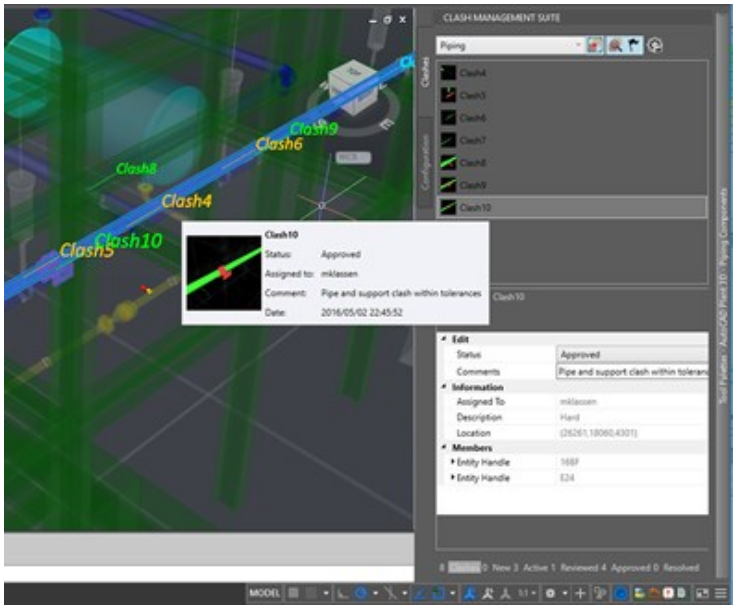


Clash Management Suite

Integrate

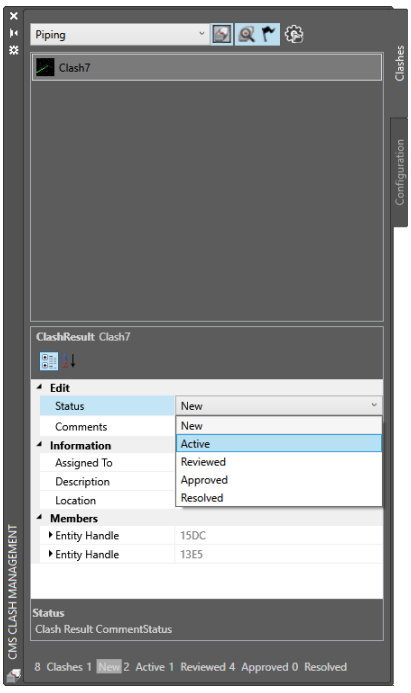
Hover over a clash in the Graphics window, or

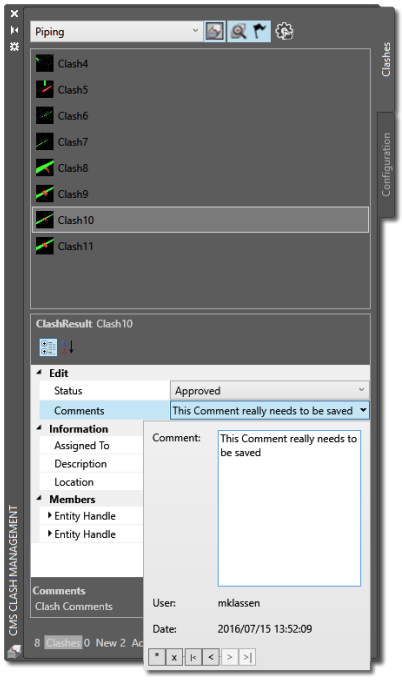




the clash list to view Clash Information.

Comments and Statuses can be edited in AutoCAD and loaded back into Navisworks.

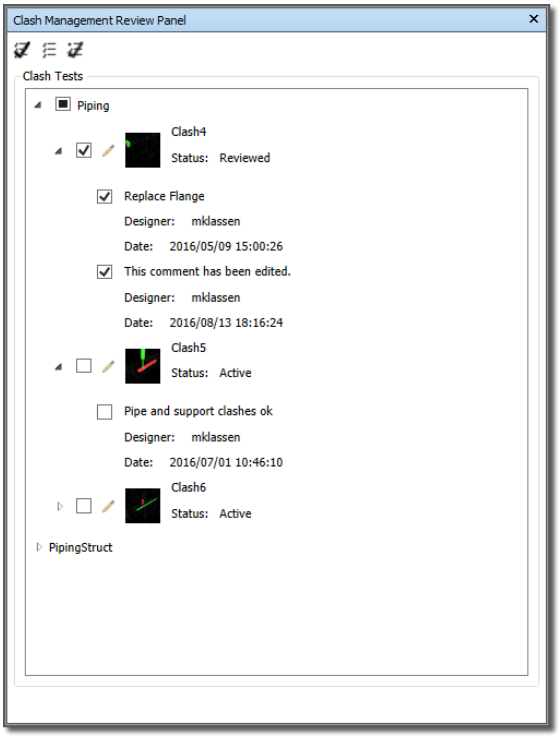


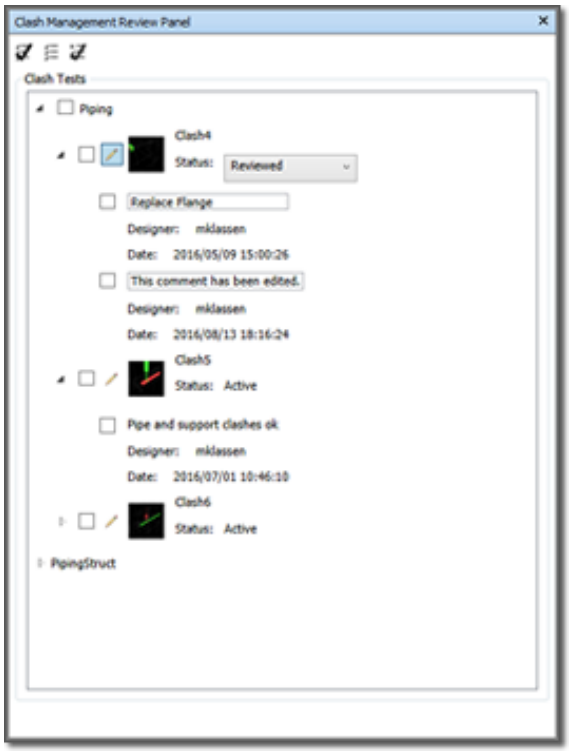


Clash Management Suite

Review /Edit

With the Navisworks Add-in, changes can be reviewed, and edited prior to updating the clashes.





Update

Once the changes are approved, they are applied to the model, and become a permanent part of the Clash History for the model.
